

Validation, Repair, Metrics, and Training Feedback

The same contract supports generation-time repair, dataset scoring, and response-to-IR training.

Contract diagnostics

Non-scoring but actionable.

- dangling child refs
- table cell loss risk
- unsupported components
- media/action placement

Dataset metrics

Score uses semantic IR signals.

schema valid 100%

content coverage ↑

table coverage ↑

token size ↓

Training target

Input: Stage 2 response

Output: strict IR JSON

Eval: same metrics

model-agnostic
